**Subject:** Microsoft Settlement

I completely oppose the settlement proposed by the States against Microsoft because

a) It is purely driven by the personal goals of the companies rather than the needs of the consumers. I being a consumer , feel , I have all the choices in the market to run any OS I want or any applications I want

b) Killing Microsoft is just going to create another one in its place under government sanction

c) All is fair, in Love , Business and War .

d) This will set a bad precedence , as any unsuccessful company , can gain market share by suing the market leader.

Please consider SUN , AOL , ORACLE , IBM . Their track records aren't any better than Microsoft.

Thanx for giving the opportunity to voice our opinions.

A Happy Consumer.
